

Winter is Here

This is the longest night of the year
Winter is here,
Winter is here,
It's cold and the stars are bright and near
Winter, winter is here.

Tomorrow the sun is turning back
Winter is here,
Winter is here,
Starting again on its southward track
Winter, winter is here.

Tomorrow the sun will be shining bright,
Winter is here,
Winter is here,
Warming us after the longest night
Even though Winter is here.

Tomorrow the golden rays will fall,
Winter is here,
Winter is here
And then the light will fill us all
Even though Winter is here.
